

Web 2.0 Tools

Web 2.0 tools are applications which give us ways of creating, collaborating, editing and sharing user-generated content online. They allow us to be active participants of online content, rather than passive viewers of the web.

TOOL	PURPOSE	EXAMPLES
Blogs	Online diary or journal entries posted on the web	www.blogger.com http://wordpress.org
File Converters	Change a variety of different file formats into another format	http://www.convertfiles.com/
Graphic Organizers	Tools to create picture representations of relationships between facts, terms & ideas	http://www.eduplace.com/graphicorganizer
Organization Tools	Personal management applications such as digital note-taking and to-do lists	http://evernote.com http://springpad.com http://www.diigo.com
Personal Learning Network	People with whom you collaborate with and exchange information	www.edmodo.com www.pinterest.com
Podcasting	Online audio broadcasting	http://www.podbean.com
Presentation Tools	Applications that allow you to insert text, audio, pictures and videos to make attractive productions	www.prezi.com www.glogster.com

Social Bookmarks	Sites that allow you to store, save, categorize and organize a personal collection of bookmarks	http://www.delicious.com
Survey Makers	Sites that allow you to create polls	www.surveymonkey.com
Web Site Builders	Sites that allow you to quickly and easily construct web site pages without specialized knowledge	www.weebly.com http://www.godaddy.com
Wiki	Sites that allow easy creation and editing of any number of interlinked web pages by a group of people for collaboration purposes	www.wikispaces.com
